Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shin et al. (U.S. Patent No. 5,164,970).

In reference to claim 1, Shin discloses in Figure 3 a variable dividing circuit (37) comprising: a shift register (5) configured by cascade connection of D-type flip-flops (17-21) with an initializing means (LP) by clock synchronization; and a selecting means (S₁-S₃) for selecting any one of output signals at respective stages of the shift register; wherein the variable dividing circuit initializes each stage of the D-type flip-flops (17-21).

In reference to claim 3, Shin discloses in Figure 3 wherein a H level signal is inputted in a first stage (17) of the D-type flip-flops; the initializing means comprises a reset means (reset terminal of the flip-flops); and the selecting means comprises a switch circuit (S₁-S₃). The same applies to claim 5, wherein the data signal is serial data that may be high or low.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2816

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin et al. (U.S. Patent No. 5,164,970).

In reference to claim 2, Shin discloses all the limitations of the claim with respect to claims 1 and 3 as mentioned above. Shin does not disclose that the selecting means comprises a multiplexer. It is considered to be well-known to one skilled in the art that the switch means disclosed by Shin could be replaced by a multiplexer having the same function for the advantage of saving space by replacing the three switches with one multiplexer. The same applies to claim 4 with reference to claims 1 and 5.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
